About me

Senior Software Engineer combining 13+ years of enterprise backend engineering with high-level architectural design and modern AI-augmented workflows.

Experienced technical lead and DevOps advocate focused on high availability, distributed event-driven systems, and accelerated software delivery. Available for B2B contracts.

Core Stack

Backend & Systems

Java 21 | Spring Boot | Apache Kafka | Spring REST | Apache Flink | Apache Spark | Tomcat | JBoss / WildFly | Jersey

Cloud & DevOps

Kubernetes | Docker | Terraform | GCP | AWS | GitLab CI/CD | Jenkins | Linux | SonarQube | Git | Maven | Ansible

Experience

Senior Full-Stack & AI Systems Engineer @ Independent R&D

2024 — Present | Prague (Remote)

AI-Augmented Systems & Full-Stack Product Delivery

- Architected and delivered end-to-end full-stack web applications (Next.js, React, TypeScript) engineered via agentic AI workflows with focus on SSR, high performance, and modular architecture.
- Integrated production third-party SaaS platforms including payments & webhooks (Lemon Squeezy), cloud object storage (Cloudflare R2), transactional email (Resend), and error observability (Sentry).
- Developed custom CLI commands, skills, and autonomous agent workflows with Anthropic Claude and Google Gemini, automating architectural refactoring, API scaffolding, and unit test generation.
- Benchmarked real-world productivity multipliers, context window management, and deterministic guardrails for AI-assisted enterprise software delivery.

Senior Software Engineer @ Conrad Electronic

07/2021 — Present | Prague (Remote friendly)

Core Checkout, Cart & Payment Processing Platform *(07/2025 — Present)*

- Architect and develop mission-critical backend services for checkout, shopping cart, and payment processing, ensuring high availability and fault tolerance during peak commercial sales traffic.
- Implement event-driven architecture using Apache Kafka and Spring Boot (Java 21) to streamline order lifecycle events and distributed transaction consistency across microservices.
- Manage cloud infrastructure and automated delivery pipelines on GCP and Kubernetes using Terraform and GitLab CI/CD.

Product Catalog Modernization & High-Throughput APIs *(07/2021 — 06/2025)*

- Led backend modernization for Conrad's product catalog platform (conrad.cz), driving end-to-end cloud-native migration from legacy infrastructure to a modern scalable stack.
- Engineered high-throughput REST APIs and data processing pipelines handling millions of product records and high-frequency catalog search queries.
- Automated infrastructure provisioning and containerized delivery pipelines using Terraform, Docker, and GitLab CI/CD, boosting deployment reliability.

Senior Software Engineer @ Ness KDC (HERE Technologies)

03/2018 — 11/2020 | Remote (USA & Berlin)

Geospatial Navigation & Streaming Platform *(USA Remote, 12/2018 — 11/2020)*

- Architected and delivered scalable microservices (Java 8/11, Spring Boot) and micro-frontends (Angular) deployed on multi-tenant Kubernetes clusters.
- Engineered high-throughput batch and stream-processing jobs (Apache Flink, Java) for geospatial mapping features including road signs, junctions, and navigation layers.
- Spearheaded enterprise CI/CD modernization: migrated build pipelines from ElectricFlow to Jenkins, containerizing build environments (Docker, Quay) towards GitLab CI.
- Served as technical mentor, coaching cross-functional engineering teams on container orchestration (Kubernetes, Docker) and modern DevOps practices.

Backend Mapping Services & Pipeline Optimization *(Berlin Remote, 03/2018 — 12/2018)*

- Developed high-performance backend mapping services for global geospatial navigation datasets using Java, Scala, and SBT.
- Optimized automated integration testing workflows and continuous delivery pipelines on AWS and Jenkins, shortening developer feedback loops.

AI & Modern Tooling

AI-Augmented Delivery

Claude Workflows
Gemini CLI & APIs | Agentic Systems
Context Design | AI-Assisted Testing
Deterministic Guardrails

Architecture & Design

System Architecture

Microservices | Event-Driven
Domain-Driven Design
High Availability (HA)
Zero-Downtime Deploy
Distributed Caching

Databases & Storage

MongoDB | Oracle DB | MySQL
MariaDB | MsSQL | DB2 | Neo4J

Frontend & Languages

React | Next.js | TypeScript
JavaScript | Python | Shell / Bash
Angular | Scala | Groovy
Thymeleaf | HTML5 / CSS3

Languages

English | Slovak | Czech
German | Hungarian

Experience (Continued)

Senior Software Consultant @ Codexa s.r.o

07/2017 — 02/2018 | Kosice, Slovakia

- Architected and delivered the production-ready prototype for an enterprise IoT platform utilizing Spring Boot microservices and Angular orchestrated on Kubernetes.
- Designed and implemented core CI/CD DevOps infrastructure with Jenkins, Docker, Sonatype Nexus, and GitLab.

Senior Software Engineer @ Ness KDC (HERE Technologies)

01/2017 — 06/2017 | Kosice, Slovakia

- Delivered full-stack mapping platform features and automated test suites with Java 8, Spring, Oracle DB, and modern web UI.
- Established modern architectural patterns and continuous integration workflows that created lasting standards across the team.

Java Developer & Tech Lead @ Senacor Technologies GmbH

10/2014 — 12/2016 | Munich & Kosice

- Spearheaded technical migration of a mission-critical German interbank ETL application from Java 5 to Java 8, substantially improving calculation throughput.
- Served as internal Tech Lead: architected attendance and automated interview platforms; mentored junior engineers.

Java Solution Specialist @ VSE a.s. (RWE Group)

09/2013 — 10/2014 | Kosice, Slovakia

- Delivered customer self-service enterprise portal (Webcentrum) for a major regional utility provider, serving thousands of active consumers.
- Engineered internal B2B enterprise applications and automated reporting systems using Java, IBM WebSphere Portal, BIRT, and DB2.

Selected Projects & Open Source

Independent Web Applications

- pokemongo.sk (2026): Jamstack interactive Pokédex and Pokémon card store directory across SK & CZ. Engineered with Astro, Tailwind CSS, TypeScript (pokemongo.sk).
- kryptotipy.sk (2026): Interactive crypto market educational game with real-time CoinGecko API data & CI/CD (kryptotipy.sk).
- peterszatmary.com: Professional personal engineering portfolio showcase (peterszatmary.com).

Open Source Contributions

- Contributor to `learnxinyminutes-docs` (community programming language reference).
- Contributor to `neo-project/neo-devpack-java` and `neo-project/examples-java` on GitHub.

Education

Technical University of Kosice

2011 — 2013 | Kosice, Slovakia

Master's Degree (Ing.) in Computer Engineering
Thesis: Analysis and Design of Distributed Applications for Cloud
Focus: Distributed Systems, Cloud Architecture, Advanced Databases, Operating Systems

Certifications & Continuous Learning

- AWS Certified Developer Associate — Udemy (2021)
- Software Architecture: Security & REST — Udemy (2021)
- Microservices Architecture & Spring Cloud — Udemy (2021, 2017)
- Complete Guide to Becoming a Software Architect — Udemy (2021)
- Apache Spark: Scalable Machine Learning & Big Data — edX (2015)
- Reactive Programming (RxJava) & TypeScript Fundamentals — Pluralsight (2016)
- Linux System Administration — T-Systems Slovakia / CentOS (2010)
